

## HQ Air - Professional

### Benefits

Powerful Indoor Air Purification and Sanitisation System for homes and offices, class rooms and areas up to 50sqm.

The HQAir Professional unit is not much bigger than the size of a pizza box, lightweight and durable it is easily mounted on any internal wall and plugged into any 240V outlet. A single unit effectively decontaminates rooms approximately 30-50m<sup>2</sup> making the HQAir Professional ideal for any room in the home, office, small retail store or classroom.

HQAir is an Australian designed, tested and patented advanced air and surface treatment system that safely and efficiently restores the balance of recirculated air by maintaining air quality as well as eliminating contaminated and poor-quality air in residential, commercial, industrial, retail, office, school and indoor public spaces.

This innovative technology produces Ions and Free Hydroxyl Radicals which are naturally occurring molecules to continuously sanitise the total volume of air, while simultaneously sanitising all soft and hard surfaces, 24/7 in an indoor environment by eliminating and preventing airborne risks and cross infection in indoor spaces including:

Bacteria which includes staph and strep;

Mould and mould spores;

Odours and other toxic fumes;

Pathogens;

Viruses, eg:

Common cold;

DNA viruses which include chicken pox;

Influenza;

RNA viruses which include COVID-19 and measles;

Stomach flu; and

Volatile Organic Compounds (VOC's).

## Features

HQAir Professional Specifications

Dimensions: 370 x 370 x 75mm

Coverage: 30m<sup>2</sup> per single unit

Power: 40 – 65 W

Controls: Touch and WiFi

Air flow: Low flow / low noise

Hydroxyl Generators & Life: 1x 12,000
